- 3/16” Allen Wrench
- 5/16” Socket Wrench
Before Installation

Before installing the bracket in the vehicle, ensure there are no missing or damaged parts from the box. If there are any missing or damaged parts, please contact: Customer Service at 866-384-8567

*Note: For more detailed instructions on installing the complete 4RE system, please refer the 4RE Vehicle Installation Instructions.

Before installation ensure that the cables are routed to the desired location of the location of the 4RE DVR (main unit).

Mounting the Universal Bracket

Possible Locations for mounting the 4RE DVR:
- Under the glove compartment in the passenger foot well.
- On the back of the cage
- In the trunk of the vehicle (preferable as a last option)

The orientation of the DVR can be vertical or horizontal.

*Note: When mounting the DVR; if mounted vertically, ensure the USB Door is faced up.

First orientate the small hole towards the front of the DVR, and then use the (4) 5/16” Hex Self Drilling Screws in the (4) predrilled holes to mount the DVR to a desired location.

The DVR can be rotated 10 degrees up or down.
After the Universal Bracket is mounted, attach the 4RE DVR to the bracket with the (4) – ¼ -20 socket head cap screws.

After the screws are tightened, then the bracket installation is complete.
