Tools Required

#2 Phillips Screwdriver
#1 Phillips Screwdriver
Black Marker Pen
Sharp Razor Knife
7/64” drill bit
Center Punch
2012+ Dodge RAM 1500 DV-1 Overhead Installation Instructions

1. Place the Cutout Template over the console “Hump” and trace the cutout opening using the black marker along the outside of the cutout slots.

2. Using a sharp razor knife, cut out along the marked traces from the previous step.

3. Place the Mounting Bracket on the top rail with the threaded standoff in the existing hole in the rail and the tabs on the Bracket up against the rail. While holding the bracket in place, mark the six mounting hole locations with the black marker. Remove the bracket.
4. Center punch the six marked mounting hole locations and drill pilot holes using the 7/64” drill bit through the rail. Use the plastic spacers as drill stops to prevent drilling through the roof.

5. Install the Mounting Bracket using the 6 - #8-32 X 5/8” washer head screws.
2012+ Dodge RAM 1500 DV-1 Overhead Installation Instructions

6. Install the Cutout Cover to the Mounting Bracket using the 4 - #6-32 X 3/8” Pan head screws and 4 - #4 flat washers. Ensure the 4 mounting standoffs protrude through the cutout slots in the cover.

7. Install the DV-1 Mounting Plate onto the DV-1 using the 4 – M3 X 6 Screws and the 4 – M3 lock washers.

8. Install the DV-1 with Mounting Plate onto the Mounting Bracket using the 4 - #8-32 X 3/4” Flat head screws.

The installation is completed, ready for wiring and should look like this:
